

FOR IMMEDIATE RELEASE

Origami Surgical awarded Agreement and Technology Breakthrough Designation for StitchKit with Premier, Inc. Premier offers Breakthrough Technology designations to innovations that offer a major advantage in terms of patient safety, clinical outcomes and operational efficiencies.

Charlotte NC – September 15th, 2025 – Origami Surgical has been awarded a national group purchasing agreement for endomechanical products with Premier, Inc. Effective 9.15.25, the new agreement allows Premier members, at their discretion, to take advantage of special pricing and terms pre-negotiated by Premier for StitchKit.

“This is a big win for Origami Surgical, Premier members, and patients alike. StitchKit is a significant step forward in eliminating the passing of exposed needles in robotic surgery. The passing of exposed needles is a significant and growing risk factor, and we are proud of the many benefits that StitchKit brings to the market. Thank you to Premier leadership for joining us on this journey to improve patient safety by providing greater autonomy to surgeons during robotic surgery.” John Hironimus, CEO Origami Surgical

StitchKit is a first of its kind solution designed to streamline needle management and enhance surgical safety and efficiency in robotic surgery. Designed to eliminate the transfer of exposed needles into and out of the sterile field, StitchKit delivers up to six sutures with needles securely in a single pass. Within the surgical field, StitchKit ensures all needles remain safely contained throughout the procedure. After each suture is used, the needle is immediately secured in StitchKit’s integrated sharps container. At the conclusion of the case, StitchKit is removed in one efficient step.

Premier is a leading technology-driven healthcare improvement company, providing solutions to two-thirds of all healthcare providers in the U.S. Playing a critical role in the rapidly evolving healthcare industry, Premier unites providers, suppliers, payers and policymakers to make healthcare better with national scale, smarter with actionable intelligence and faster with novel technologies. With integrated data and analytics, collaboratives, supply chain solutions, consulting and other services, Premier enables better care and outcomes at a lower cost.

Origami Surgical has developed StitchKit- a unique, patented portfolio of products engineered to enhance robotic-assisted surgery by allowing the surgeon to manage all aspects of suture use and needle disposal. This technology is designed to improve safety, autonomy, and surgical efficiency. More information can be found at www.origamisurgical.com
